

Analysing Financial Statements

Duration 1-day

Course Description

This interactive finance course is designed for managers and executives who need to improve their understanding of how to interpret financial statements whether this is to improve decision making or to understand another company's performance.

The course will equip you with skills and knowledge so that you can understand financial statements, how to interpret them and how to use the data to make more informed decisions.

Through the course you will analyse and interpret published financial statements.

Outcomes
